

GIS Web Developer

An opportunity to work with one of the leading GIS software development organizations. If you have exceptional talent and interpersonal skills and meet the description below, send your resume to personnel@gis-services.com. You can learn more about us at www.gis-services.com

Role Summary

The GIS Web Developer is a member of the Application Development team and focuses on design, development, and implementation of Geographic Information System based software solutions. The role is responsible for development of web-based GIS solutions primarily using ESRI technologies in the Microsoft .NET development environment.

Essential Functions:

- Designing and developing customized web-GIS applications
- Developing custom viewers, databases, and technical applications for specific client applications
- Application design and development in a team environment
- Contributing to proposal and work estimate activities
- Developing application test plans
- Mentoring other software developers
- Assisting clients with on-site implementation and training
- Must be able to obtain Department of Defense Security Clearance

Competencies and Skills:

- A passion for working with teammates and customers to solve problems
- Excellent communication skills
- Ability to multi-task, prioritize and meet deadlines
- Experience with developing solutions in the following technologies: ArcGIS Server, ArcGIS, ArcSDE
- Thorough knowledge of the following software packages and technologies: Microsoft .NET (VB and/or C#), Oracle, MS SQL Server
- Knowledge of Internet architectures and technologies
- Knowledge of Microsoft and/or Linux-based server technologies
- Knowledge of geospatial concepts
- Familiarity with standard software development protocols
- Application documentation including system design and technical specifications
- Dynamic, personable and self-motivated personality

Experience:

Preferred

- Bachelors Degree in computer science or GIS-related field
- 3+ years experience as a software developer
- 2+ years experience developing ESRI-based web applications, with preference for ArcGIS Server and ArcObjects
- Experience with Oracle and/or SQL Server databases

Ideal

- Graduate degree in a computer science or GIS-related field
- 3+ years as a web software developer

Work Environment:

- Company headquarters is in Birmingham, AL. Virtual work arrangements can be discussed.
- Travel 10% of the time.
