SMALL GOVERNMENT ELA SERVICE & PRODUCT OFFERINGS

ArcGIS Server Implementation Services — Starting at \$2,200

It's time to **jump start** your *ArcGIS Server* implementation! **Author, Serve, & Use in Days**

STEP 1: Clean the dust off of your ESRI ArcGIS Server Software box.

STEP 2: Call GISi and ask about our bundled implementation service that will have you up and running in days.

GISi will send an authorized consultant to your office for this implementation. Service levels are based on your license level. Descriptions and pricing are provided below (all prices include airfare, hotel, car rental, per diem, and other direct costs):

ArcGIS Server Workgroup Basic	GISi will provide up to one day of installation and configuration support for ArcGIS Server Workgroup Basic software on up to two customer-provided hardware servers.	\$2,200
ArcGIS Server Workgroup Standard	GISi will provide up to two days of installation and configuration support for ArcGIS Server Workgroup Standard software on up to two customer-provided hardware servers.	\$3,800
ArcGIS Server Workgroup Advanced	GISi will provide up to three days of installation and configuration support for ArcGIS Server Workgroup Advanced software on up to two customer-provided hardware servers.	\$5,400
ArcGIS Server Enterprise Basic	GISi will provide up to two days of installation and configuration support for ArcGIS Server Enterprise Basic software on up to two customer-provided hardware servers.	\$3,800
ArcGIS Server Enterprise Standard	GISi will provide up to three days of installation and configuration support for ArcGIS Server Enterprise Standard software on up to four customer-provided hardware servers.	\$5,400
ArcGIS Server Enterprise Advanced	GISi will provide up to four days of installation and configuration support for ArcGIS Server Enterprise Advanced software on up to eight customer-provided hardware servers.	\$7,000

◆ **Deliverables:**

- * Installation, configuration of ArcGIS Server, connecting to your data, and standing up an ArcGIS Server website using the out-of-the-box template (*website service only available for customers with standard and advanced levels ArcGIS Server*).
- * Pre-visit WebEx to review your organization's existing infrastructure, data, and software

◆ **What's Required:**

- * ESRI ArcGIS Server license
- * Server dedicated for ArcGIS Server meeting the minimum system requirements as provided by ESRI
- * Web Server and RDBMS are installed and working in a production environment.

This bundled service is designed specifically to help organizations get a jump start on their ArcGIS Server implementation. Organizations that have specific design/customization requirements and are looking to integrate ArcGIS Server with your other IT business systems call us to get more information on our full suite of implementation services (Architecture, Design, Development, Implementation, Data Modeling, and Migration).

SMALL GOVERNMENT ELA SERVICE & PRODUCT OFFERINGS

GIS HealthCheck—\$5,000 (plus travel):

Are you inundated with the daily grind? Is it hard to find time to technically diagnose your GIS or to even create a roadmap? Then call GISi to learn more about our 2-day GIS HealthCheck. A *medical healthcheck* includes diagnostics (tests), a lifestyle assessment, and prescriptions or recommendations for improvement. The *GIS HealthCheck* has similar components: a technical diagnostic of the GIS, an assessment of the business utilization of the GIS, and finally a prescription, or suggestions for the future.

- ◆ **Duration:** 1 week
- ◆ **Deliverables:** 2-days onsite GIS stakeholder interviews, GIS HealthCheck report soft (PPT) and hard copies (2—bound), WebEx presentation of your report to you and your staff.
- ◆ **What's Required:**
 - * Access to your organization's GIS stakeholders for the 2-day onsite interviews
 - * Completed pre-visit questionnaire
 - * Samples of your GIS data loaded on CD/DVD for us to take with us

ArcGIS Server Applications: ArcGIS Server Muscle. Point & Click Simple:

GISi is launching 3 custom ArcGIS Server (AGS) Applications to jumpstart your organization's web GIS deployment. These applications will be released **Fall 2008** and available in AGS 9.3. Whether your organization:

- * Owns AGS, but doesn't have it installed
- OR**
- * Owns AGS and has deployed a website, but is looking to extend the functionality

These products are for you! These products are designed to be as self-contained as possible starting with the purchasing experience. Each product will soon be available for purchase and downloaded off of our website. Product descriptions and pricing are provided below:

Serving Up Your World, On-Demand:

- ◆ **Data Viewer —\$7,500:** Struggling to present multiple business requirements and department data in a web environment? Data Viewer delivers customized query information for multiple GIS departments, in an easy-to-use tabbed view. Just click on the department's tab you want to access—and follow the simple prompts. There's never been a more user-friendly way to harness the power of ArcGIS Server.
- ◆ **Map Book —\$10,000:** "Hey! When will my map books be ready?" Imagine never hearing that question again. With Map Book, anyone can create their own map books—from select tiles to all tiles that makeup your jurisdiction's entire area. Customized to display only the department-specific layers requested, and printable to PDF in multiple sizes and layout templates.
- ◆ **Data Download—\$10,000:** How much time does your department spend fulfilling GIS data requests? With Data Download, users can easily download the data they need—in the formats (GIS and CAD) they need – and perhaps most importantly, when they need. Data Download—saving your department even more time every day!

Visit our website www.gis-services.com to learn more about these products and to register to receive product release updates/information.
